

Julie Stevenson Benefit

Northern Lights Ballroom & Banquet Center
10376 112th Ave | Milaca MN

Julie had a life-saving liver transplant on March 9, 2017. She battled Primary Sclerosing Cholangitis, a disease of her bile duct which severely damaged her liver. It was a long, stressful and scary road leading up to the transplant with 4 hospitalizations in the 6 weeks prior to transplant. Post surgery had many more ups and downs and after a 34 day hospital stay plus 2 additional weeks in Rochester, she was finally back home to Milaca. She had round-the-clock care from family members until just recently. She has been working hard to get her strength and independence back. Her 4-month check-up and testing at the Mayo in July showed the new liver working beautifully! She continues to have bi-weekly labs locally which are monitored by the Mayo. She'll have another round of re-testing on her transplant anniversary date in March of 2018. Thanks to this amazing gift of life, she has many more years to enjoy life with family and friends! Thank you for all the love and support shown already to our entire family.

We would like to help relieve some of the financial burden of the medical expenses through the proceeds of this benefit event.
